 - "JavaScript Algorithms and Data Structures" (*freeCodeCamp*) **08.2023**

EXPERIENCE

I've curated a portfolio website not only as a testament to my skills but also as a tangible project that showcases my capabilities. Throughout my academic journey, I've tackled diverse projects, ranging from data analysis using SQL, to system optimization, and even some projects for fun like small games. I'm excited to embark on an internship that allows me to put theory into practice and contribute meaningfully to an organization's growth
